SYNTHETIC ROBOT OPERATING GUIDELINE

Fictional retrieval-demo content; not an approved safety procedure.

Before a pick operation, confirm the task is authorized.

Verify the workspace is clear and the target is identified

in the approved task plan.

Confirm the gripper state is appropriate for the task.

Keep the emergency stop accessible and protective guards

or interlocks active.

If any prerequisite is uncertain, stop and request qualified review.

This sample defines no motion, speed, force, or deployment commands.
